HM-D1		<b>Assess Beach and Dune Habitat Loss</b>					
HM-D1	1	MBNEP will conduct coordinated outreach to stress importance of beach and dune systems. LOCAL GOVERNMENTS will be encouraged to reduce habitat fragmentation of beach and dunes to protect critical habitats, particularly those under land development pressure through the development and enforcement of zoning ordinances and regulations that limit habitat fragmentation. These areas should be included in FEMA mitigation efforts as a mechanism for reducing future hurricane damages.	1 workshop on zoning issues related to habitat fragmentation and beach and dune protection; Model zoning ordinances to protect such lands	*Acres of habitat protected or restored *Shoreline/Riparian change trends	Increase in nonfragmented habitats	2002	ongoing
