

**Mobile Bay National Estuary Program  
Management Conference CCMP Priorities**

CCMP	#	Implementation Activities (revised 2006)	TARGET OUTPUTS NEXT 3 YEARS	INDICATORS	OUTCOMES	Year Initiated	Status
<b>HM-D2</b>		<b>Regional Sediment Management (previously Determine Impacts of Dredging on Coastal Habitats)</b>					
<b>HM-D2</b>	1	USACE will coordinate with MBNEP to develop a Task Force focusing on regional sediment management and beneficial uses and coordinate with the Gulf States Alliance Action Plan.					initiated
<b>HM-D2</b>	2	USACE coordinate with the Task Force to develop a Regional Sediment Management Plan, based on the Upper Mobile Harbor Dredge Management Plan that includes sedimentary dynamics of Mobile Bay and the Tensaw Delta. This plan will include a sediment budget for the Bay and Delta to establish baseline sediment conditions and determine the relationship between fringe wetlands and sediment dynamics. The resulting management plan will determine positive and/or negative impacts, if any, associated with dredged material management practices, including, but not limited to: circulation impacts due to dredged material mounding; beneficial uses of dredged material; and "within-bay" disposal for erosion reduction.		*Acres of Habitat protected or restored	Improved sediment
