

WHO SHOULD ATTEND

- Elected officials
- Appointed officials
- Utility Board Members
- Planning Commissioners
- Real Estate Developers
- Other interested individuals

COMMUNITY LEADER TRAINING 2006

WHY YOU SHOULD ATTEND

As officials and coastal decision-makers, you make important decisions that affect the health, economic development, and environment in your community. This training will enable you to more positively respond to critical wastewater challenges.

WASTEWATER MANAGEMENT ALTERNATIVES: FUNCTIONAL MODELS & INFRASTRUCTURE COSTS

THIS TRAINING SESSION WILL

- Help you better understand centralized and decentralized wastewater management processes and options
- Provide current science-based information, tools, and techniques for managing wastewater collection and treatment alternatives
- Enable improved decision-making related to wastewater management alternatives in coastal Alabama
- Help to develop a partnership among decision-makers for networking and collaboration on wastewater issues and economic development

~ A Community Leader Training for Coastal Alabama ~

The training is a joint product of the:

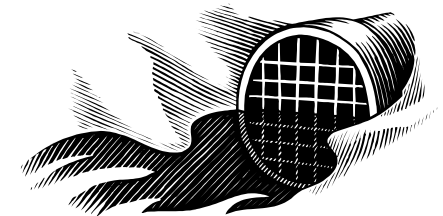

- Alabama Coastal Foundation
- Mobile Bay National Estuary Program
- Coastal Training Program at Weeks Bay National Estuarine Research Reserve - Alabama Department of Conservation and Natural Resources, State Lands Division, Coastal Section.

Funding for this project is provided in part by the Coastal Zone Management Act of 1972, as amended, administered by the Office of Ocean and Coastal Resource Management, National Oceanic and Atmospheric Administration.

This document is printed on recycled paper.

Tuesday, 20 June
Jon Archer Extension Building
Mobile, AL
7:30 AM — Noon

TRAINING PRESENTER

Kevin D. White, Ph.D., P. E. is a professor of environmental engineering and Chairman of the Department of Civil Engineering at the University of South Alabama. He has been actively researching small community/onsite wastewater systems and storm water Best Management Practices for over 14 years, including constructed wetlands (for both wastewater and storm water treatment applications) and decentralized wastewater concepts. His educational background includes Bachelor and Master's degrees from LSU and a Ph.D. in Civil Engineering from Virginia Tech. He is a charter board member of the Alabama Onsite Wastewater Board.

TRAINING AGENDA

- 7:30 AM Sign-in and continental breakfast
- 8:00 Introduction,
Wastewater Management: Why?
- 8:30 A comparison of Centralized &
Decentralized Wastewater
Infrastructure
- 9:30 Collection and treatment Alternatives
- pressure sewer
 - grinder pumps
 - effluent sewer
 - constructed wetlands
- 10:15 Field Trip to Decentralized Waste
water Treatment site
- 11:45 Return to classroom for wrap-up &
training evaluations
