

Initial Vision of Mon Louis Island Residents for Habitat Creation

Placement of reef and marsh materials are not drawn to scale, but only reflect proposed locations as indicated by residents participating in the July 29 visioning exercise. Improvements to property and other information recorded in the GIS attributes file (from which this map was derived) are indicated by the labeling on this map.

Disposal site for dredge material from Fowl River. Material flows back with a southeasterly wind.

195-ft pier. Pilings continue to future dockhouse at 300-ft.
