

The following is a compiled list of proposed projects generated from different lists developed after the Deepwater Horizon Oil Spill by local resource management agencies and non-governmental organizations. Only projects that would directly effect improvements in water quality or ecosystem function were included in this compilation. Each row represents a proposed project with a brief description, the watershed(s) where it is located, the list(s) from which this project was derived, and a very broad restoration classification. No project cost estimates were included, and this compilation was only generated to reflect the breadth of activities proposed for restoration, acquisition, or protection. Source lists are indicated below:

- ARBOR - Alabama Coastal Recovery and Beneficial Use Operation and Response Plan (Army Corp of Engineers)
- Baykeeper NRDA Restore Act List
- CRC - Coastal Recovery Commission
- MBNEP Reg IV List - Developed by Mobile Bay NEP for EPA Region IV
- NOAA NRDA List - Projects submitted to NOAA for Natural Resource Damage Assessment consideration
