

# TRASH *Blows!* ...STOW IT!

*Did you know?*

- Motorists generate 53% of litter in the U.S. roadways each year.
- Almost 29% of truck drivers are aware of unsecured trash flying out of their truck beds.
- It takes plastic bottles 450 years to decompose in the environment.
- Litter cleanup costs the U.S. almost \$11.5 billion each year, with businesses paying \$9.1 billion, and taxpayers picking up the remainder.

The City of Mobile is on a mission to reduce the amount of litter on area roads and waterways. Let's work together to stop litter caused by trash that blows out of pick-up trucks. Sign the Pledge to make a Litter-Free Mobile.

*How can you reduce truck bed trash?*

## STOW ALL TRASH

IN A CAN BEFORE HITTING THE ROAD.

## INSTALL A RECEPTACLE

IN YOUR TRUCK BED TO COLLECT TRASH.

## VISIT

CLEANWATERFUTURE.COM TO MAKE A NEW YEAR'S RESOLUTION AND SIGN THE PLEDGE!
