

TRASH *Blows!* ...STOW IT!

Did you know?

- Motorists generate 53% of litter in the U.S. roadways each year.
- Almost 29% of truck drivers are aware of unsecured trash flying out of their truck beds.
- It takes plastic bottles 450 years to decompose in the environment.
- Litter cleanup costs the U.S. almost \$11.5 billion each year, with businesses paying \$9.1 billion, and taxpayers picking up the remainder.

The City of Mobile is on a mission to reduce the amount of litter caused by trash that blows out of pick-up trucks. Our goal is to reduce trash blowing onto our roads and waterways. Do your part to make a Litter Free Mobile!

How can you reduce truck bed trash?

STOW ALL TRASH

IN A CAN BEFORE HITTING THE ROAD.

INSTALL A RECEPTACLE

IN YOUR TRUCK BED TO COLLECT TRASH.
