

CITY-WIDE **RESILIENCE** ASSESSMENT AND PLAN **RESILIENCE SURVEY**

The City of Mobile is undertaking an 18-month effort to develop a City-wide Resilience Assessment and Plan.

The goal of this effort is to ensure that Mobile can withstand, adapt, and thrive no matter what challenges the city may face in the future—including, but not limited to, climate change, sea-level rise, and changing social and economic conditions.

This survey is intended to capture residents' perspectives on resilience in Mobile. This information will be used to better understand what a Resilient Mobile looks like to you.
